

Dig Type Fencing

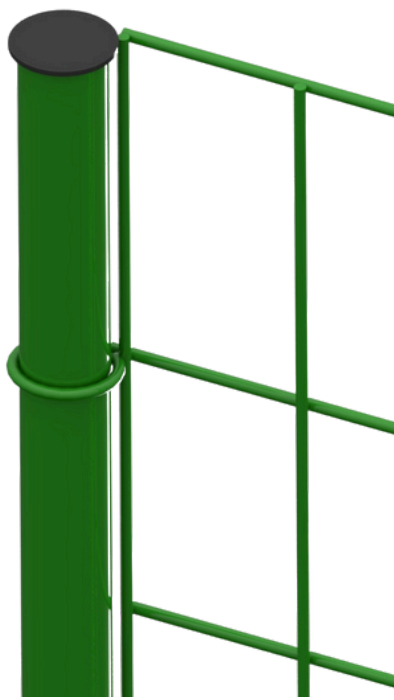

Weld mesh Fencing

Weld mesh fencing is a type of fencing made from steel wires welded together to form a uniform grid pattern. It is commonly used for security, safety, and containment purposes in residential, commercial, industrial, and agricultural settings. The wires are typically welded at each intersection, creating a strong and durable mesh structure.

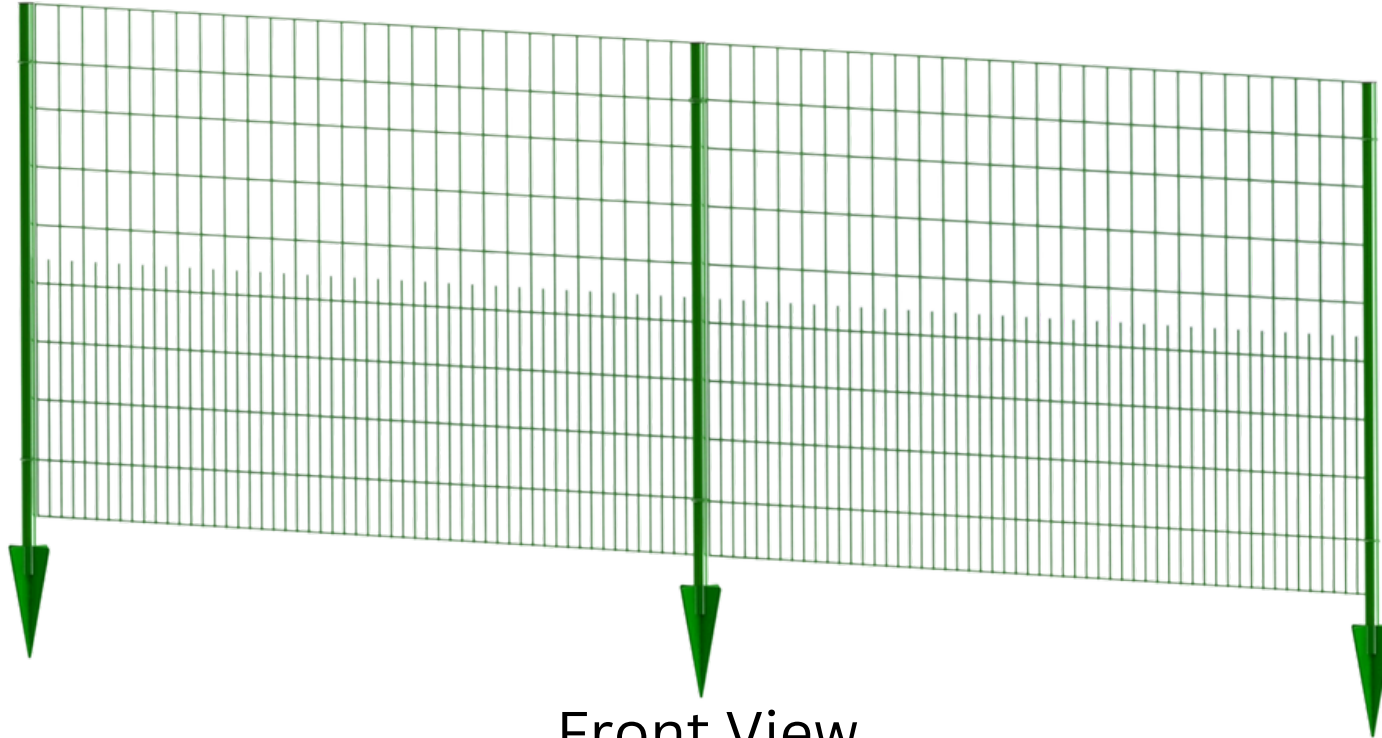

S no	Wire dia	Fencing Lenght(in ft)	Fencing Height (in ft)
1	4 mm	4 ft, 6ft, 8ft, 10ft	3 ft, 4 ft, 5 ft, 6 ft and 8 ft
2	5mm		
3	7mm		

Why Choose Our weld Mesh Fencing?

- Anti climb Deterrent
- Reinforced structure
- Cost-Effective Solution
- Low maintenance Need
- Enhance Durability
- No accessories Needed
- Simple Design
- Excellent Ventilation & Visibility
- Customizable Sizes & Shapes
- Quick Assembly & Disassembly
